

An Essential Tool for Designers

Introducing our innovative Sample Box, designed to be an indispensable companion during design phases. This elegant and functional box offers practicality, aesthetics, and versatility, ensuring designers have easy access to samples and a refined decorative piece for storage.

Key Features

Tabletop Sample Holder: The box can be split into two parts, each holding glass or paper samples for quick, organized access.

Secure Sample Transport: MDF supports provide stable and safe transport for glass samples.

Versatile Use: Each MDF support can be used individually as a desk display.

Light Effect Simulation: When placed vertically, it simulates light effects on samples from front and back lighting.

Aesthetics and Maintenance

Made of high-quality MDF, dyed in mass for easy cleaning with an abrasive sponge or dry sandpaper. Its elegant design integrates seamlessly into any workspace as a desk display or shelf decoration.

Disclaimer

The specimen holder must only be moved using the cut-out handles at the top. Glass samples are fragile and can break if mishandled. Use with care to avoid shocks and drops. The manufacturer is not responsible for damages from improper use.
